

DIASTATIC

Meaning: Diastatic refers to the ability of an enzyme, particularly amylase, to break down starches into sugars, which is essential in processes like fermentation and baking.

1. The diastatic activity of the enzyme is crucial for the fermentation process in brewing.
2. In baking, diastatic malt can enhance the flavor and texture of the bread.
3. Using diastatic malt powder can improve the browning of the crust in baked goods.
4. The brewer carefully measured the diastatic units to ensure optimal sugar conversion.
5. Understanding diastatic reactions can help food scientists develop better food products.
