

DIASTEMA

Meaning: Diastema is a gap or space between two teeth, commonly observed in children as they transition to their adult teeth.

1. A diastema is often seen as a unique feature that can enhance a person's smile.
2. Many children experience a diastema during their developmental years as their adult teeth begin to emerge.
3. Some cultures view a diastema as a sign of beauty, celebrating the distinct gap between the teeth.
4. While a diastema is usually harmless, some people may choose to have it closed for cosmetic reasons.
5. Orthodontists often assess the size and position of a diastema when planning treatment for alignment issues.
