

DIBASIC

Meaning: Dibasic refers to a chemical compound, particularly an acid, that contains two acidic hydrogen atoms capable of dissociating in solution.

1. Dibasic acids are commonly used in the production of various industrial chemicals.
2. The dibasic structure of the molecule allows for greater interaction with other compounds.
3. Many dibasic amines serve as effective intermediates in the synthesis of polymers.
4. In organic chemistry, dibasic salts can exhibit unique properties compared to their monobasic counterparts.
5. The dibasic nature of the compound makes it essential for specific biochemical processes.
