

DIERESIS

Meaning: Dieresis is a diacritical mark (¨) placed over a vowel to indicate that it should be pronounced separately from an adjacent vowel.

1. The dieresis is often used in poetry to indicate a break between two adjacent vowels.
2. In some languages, the dieresis changes the pronunciation of a vowel, creating a distinct sound.
3. The term "naïve" features a dieresis to highlight the separate syllables in the word.
4. Her name, Zoë, includes a dieresis, which adds a unique flair to its pronunciation.
5. In written French, the dieresis can be found in words like "Noël" to guide correct articulation.
