

DISEMPLOYMENT

Meaning: Disemployment refers to the state of being unemployed or the condition of having a significant number of people without jobs, often due to economic factors.

1. The recent economic downturn has led to a significant rise in disemployment across various sectors.
2. Policymakers are concerned that prolonged disemployment could result in long-term social issues.
3. Many workers are struggling to cope with the emotional toll of disemployment after years of stable employment.
4. Efforts to reduce disemployment must focus on retraining programs and support for affected individuals.
5. Communities hit hard by disemployment are banding together to create job fairs and networking events.
