

DIVERSIFIER

Meaning: A diversifier is an element or strategy that reduces risk by broadening exposure across various categories or sources, such as asset classes or revenue streams.

1. A diversifier in an investment portfolio can help mitigate risk by spreading exposure across different asset classes.
2. The company's new product line serves as a diversifier, reducing its dependence on a single revenue stream.
3. As a diversifier, real estate can provide stability and potential growth in a fluctuating market.
4. Incorporating diverse suppliers is a strategic move for companies looking to enhance their supply chain as a diversifier.
5. The chef used a variety of spices as a diversifier to elevate the flavors of the traditional dish.
