

DIVERTER

Meaning: DIVERTER: A device used to redirect the flow of water from one outlet to another, commonly found in plumbing fixtures like faucets and showers.

1. The plumber recommended installing a diverter to direct water flow from the main pipe.
2. In order to enhance the shower experience, she opted for a new faucet with a built-in diverter.
3. The diverter allowed the water to switch seamlessly between the bathtub and the showerhead.
4. During the heavy rain, the diverter successfully channeled excess water away from the foundation.
5. The engineer explained how the diverter mechanism prevents backflow in the irrigation system.
