

DIVERTICULUM

Meaning: Diverticulum is a small, bulging pouch that can form in the lining of the digestive tract, particularly in the colon.

1. The diverticulum in the patient's colon was causing significant discomfort.
2. Surgeons often encounter diverticulum during procedures related to gastrointestinal health.
3. A diverticulum can form when weak spots in the intestinal wall bulge outwards.
4. Dietary changes are recommended to help manage symptoms related to diverticulum.
5. Complications from a diverticulum may lead to inflammation or infection if not monitored.
