

DOFFER

Meaning: Doffer: a worker in a textile mill who removes full bobbins or spools of yarn from spinning machines and replaces them with empty ones.

1. The doffer quickly replaced the empty spindles with new bobbins of yarn.
2. In the textile mill, the doffer played a crucial role in maintaining the flow of production.
3. After the machine stopped, the doffer skillfully removed the full spools to prepare for the next cycle.
4. Working as a doffer can be physically demanding, requiring both speed and attention to detail.
5. As technology advanced, many mills replaced manual doffers with automated systems for efficiency.
