

DRAINER

Meaning: Drainer: a kitchen utensil or device used to remove liquid from food, such as pasta or vegetables, typically featuring holes or a mesh design.

1. The chef reached for the drainer to let the pasta cool before serving.
2. After washing the vegetables, she placed them in the drainer to remove excess water.
3. He invented a new type of drainer that prevents food particles from clogging the sink.
4. A good quality drainer can make a significant difference in kitchen efficiency.
5. She noticed that the drainer had a small crack, which could lead to leaks.
