

EBONITE

Meaning: Ebonite is a hard, black rubber-like material made from vulcanized natural rubber, commonly used in the manufacture of items like billiard cues and fountain pens due to its density and durability.

1. Ebonite is frequently used to make high-quality billiard cues due to its dense and durable properties.
2. The luxurious appearance of ebonite makes it a popular choice for crafting elegant fountain pens.
3. Many vintage phonographs feature ebonite components, enhancing both their aesthetic and acoustic qualities.
4. Ebonite, a hard rubber material, is often utilized in electrical insulators for its excellent insulating properties.
5. The artist chose to carve the statue from ebonite, appreciating its deep, rich color and smooth finish.
