

ENDOMETRIUM

Meaning: Endometrium: the inner lining of the uterus that thickens in preparation for pregnancy and is shed during menstruation if fertilization does not take place.

1. The endometrium thickens each month in preparation for a potential pregnancy.
2. During a menstrual cycle, the endometrium sheds if fertilization does not occur.
3. Abnormalities in the endometrium can lead to various reproductive health issues.
4. A biopsy of the endometrium may be necessary to diagnose certain conditions.
5. Hormonal changes significantly affect the structure and function of the endometrium.
