

# ENDOSCOPY

*Meaning: Endoscopy is a medical procedure that involves the insertion of a flexible tube with a camera into the body to visualize and examine internal organs or cavities.*

1. The doctor recommended an endoscopy to investigate the persistent abdominal pain.
2. During the endoscopy, the specialist discovered signs of inflammation in the patient's stomach lining.
3. Patients often feel anxious before an endoscopy, but the procedure is typically quick and painless.
4. Advancements in technology have made endoscopy a safer and more effective diagnostic tool.
5. After the endoscopy, the results showed that the patient did not have any serious gastrointestinal issues.
