

ETHNOLOGY

Meaning: Ethnology is the comparative and analytical study of cultures and their social practices across different societies.

1. Ethnology provides insights into the cultural practices of various societies around the world.
2. Many universities offer specialized courses in ethnology to prepare students for careers in anthropology.
3. The study of ethnology can reveal how historical events have shaped modern cultural identities.
4. Ethnology often involves fieldwork, where researchers immerse themselves in the communities they study.
5. By comparing different cultures, ethnology helps us understand the diversity of human experiences.
