

EXCAVATION

Meaning: Excavation is the process of digging or removing earth to uncover archaeological artifacts or prepare a site for construction.

1. The excavation of the ancient ruins revealed artifacts that changed our understanding of the civilization.
2. During the construction project, the team encountered unexpected challenges related to the excavation site.
3. Archaeologists often spend years studying the findings from a single excavation to piece together historical narratives.
4. The careful excavation of the site was essential to preserve the integrity of the fossils discovered there.
5. Heavy machinery was brought in to expedite the excavation process, allowing the team to dig deeper into the ground.
