

FALSISM

Meaning: Falsism is the philosophical stance that emphasizes the rejection of unverified claims and the acceptance of falsifiability as a criterion for knowledge.

1. Falsism can lead individuals to accept unverified claims without critical thinking.
2. In philosophical debates, falsism contrasts sharply with theories that prioritize verification.
3. The scientist's commitment to falsism helped her refine her hypotheses through rigorous testing.
4. Critics argue that falsism undermines the value of subjective experience in understanding truth.
5. Falsism challenges the notion that all beliefs must be provable to hold significance.
