

FATALISM

Meaning: Fatalism is the philosophical belief that events are predetermined and inevitable, limiting the influence of individual choices on one's destiny.

1. Fatalism teaches that our destinies are predetermined, leaving little room for personal agency.
2. Many philosophers argue against fatalism, asserting that individuals can shape their own futures through choices.
3. The characters in the novel grapple with fatalism, believing their fates are sealed by forces beyond their control.
4. Despite her beliefs in fatalism, she often found herself striving to change her circumstances.
5. His fatalism made it difficult for him to seize opportunities, as he felt they would lead to the same inevitable outcome.
