

FERTILIZER

Meaning: FERTILIZER: a substance added to soil or plants to supply essential nutrients and enhance growth and productivity.

1. Using organic fertilizer can significantly improve soil health over time.
2. Farmers often apply fertilizer to increase crop yields and ensure food security.
3. The gardener was careful to choose a fertilizer that was safe for the environment.
4. After the heavy rains, the fertilizer had washed away, leaving the plants nutrient-deficient.
5. To promote flowering, it's essential to use a fertilizer that is high in phosphorus.
