

FEUDATORY

Meaning: Feudatory: a vassal or subordinate lord who holds land and owes loyalty and military service to a higher authority, typically a king or overlord.

1. The king ruled over a vast territory, with many feudatory lords swearing loyalty to him.
2. In medieval times, a feudatory was often expected to provide military support to their overlord.
3. The duke's feudatory status granted him certain privileges, but also imposed obligations to the crown.
4. Feudatory relationships were complex, often leading to alliances and rivalries among noble families.
5. As a feudatory of the empire, the baron had to balance his loyalty between the king and his own interests.
6. The feudatory states maintained a fragile alliance, often swayed by external pressures.
7. In medieval times, a lord's power over his feudatory was often absolute, demanding loyalty and tribute.
8. The treaty sought to stabilize relations between the kingdom and its feudatory regions.
9. Many feudatory leaders found their authority challenged by emerging centralized powers.
10. Historically, the relationship between a king and his feudatory could be both lucrative and contentious.
