

# FLOE

*Meaning: FLOE: A sheet of floating ice, typically found in polar regions, that can vary in size and is often part of larger ice formations.*

1. The polar expedition was halted when they encountered a massive floe drifting into their path.
2. As the sun set, the ice floe glimmered like diamonds against the darkening sky.
3. Wildlife photographers flocked to the region to capture the breathtaking beauty of the ice floes.
4. In the midst of the thaw, the once solid floe fragmented into smaller, precarious pieces.
5. Sailors warned each other about the dangers of navigating through shifting floes in icy waters.
