FLOODING

Meaning: Flooding is the overflow of water onto land that is normally dry, often caused by heavy rainfall or the overflowing of rivers.

1. The heavy rainfall caused severe flooding in the downtown area.
2. Residents were evacuated as the river overflowed its banks, leading to widespread flooding.
3. After weeks of drought, the sudden melting of snow resulted in flooding across the valley.
4. Emergency services were overwhelmed by the number of calls related to flooding and water damage.
5. The community came together to provide support and aid to those affected by the devastating flooding.
