

FLUE

Meaning: A flue is a duct or opening in a chimney that allows smoke and gases to escape from a fireplace or heating system.

1. The chimney's flue was clogged with soot, causing smoke to fill the living room.
2. To ensure safety, it's important to have the flue inspected regularly.
3. The gas furnace requires a proper flue to vent exhaust gases outside.
4. During the renovation, they discovered the flue needed to be replaced entirely.
5. A well-maintained flue can significantly improve the efficiency of a fireplace.
6. The chimney's flue needed to be cleaned before the winter season began.
7. A cracked flue can lead to dangerous gas leaks in the home.
8. To improve efficiency, he installed a new flue system for the furnace.
9. The smoke rose gracefully through the flue, indicating a warm fire inside.
10. During the inspection, the technician found a blockage in the flue that required immediate attention.
