

FREIGHTER

Meaning: Freighter: a large ship or vessel designed for transporting cargo and goods across bodies of water.

1. The freighter sailed smoothly across the ocean, carrying goods to distant ports.
2. With its massive cargo hold, the freighter was able to transport thousands of containers at once.
3. The crew worked tirelessly to ensure that the freighter was loaded and ready for its long journey.
4. Environmental regulations have prompted many freight companies to invest in more fuel-efficient freighters.
5. As the freighter approached the harbor, the excitement of the dock workers was palpable.
