

GABLET

Meaning: A gablet is a small gable or decorative feature on a roof, often used to enhance architectural style.

1. The architect designed a stunning house with a gablet that added character to the roofline.
2. During the renovation, they decided to restore the original gablet to preserve the building's historical charm.
3. The gablet provided extra space in the attic, making it the perfect spot for a cozy reading nook.
4. As the wind whipped around the corner, the gablet's shape helped deflect the gusts away from the main structure.
5. In traditional architecture, a gablet often serves as a decorative element that enhances the overall aesthetic of the building.
