

GADOLINIC

Meaning: Gadolinic refers to substances or compounds that contain or are derived from gadolinium, particularly in the context of their chemical properties and applications in materials science and electronics.

1. The gadolinic compounds demonstrated remarkable stability under varying temperature conditions.
2. Researchers are investigating the potential applications of gadolinic materials in advanced electronics.
3. Gadolinic ions are known for their unique magnetic properties, which are useful in medical imaging.
4. The synthesis of gadolinic nanoparticles has opened new avenues in targeted drug delivery systems.
5. In the field of chemistry, gadolinic elements play a crucial role in enhancing catalytic processes.
