

GADWALL

Meaning: Gadwall is a medium-sized freshwater duck, known for its understated plumage and often found in wetlands, particularly during winter.

1. The gadwall is often overlooked due to its subtle plumage, yet it is a remarkable duck.
2. During the winter months, gadwalls can be spotted in various wetlands across North America.
3. Birdwatchers frequently gather to observe the gadwall's unique feeding habits at the pond's edge.
4. The male gadwall is distinguished by its grayish-brown feathers and a black rear end.
5. As spring approaches, gadwalls return to their breeding grounds, marking a vibrant time in the wetlands.
