

GANNET

Meaning: A gannet is a large seabird known for its distinctive long wings and diving ability, often found in coastal regions and feeding primarily on fish.

1. The gannet dove gracefully into the ocean, its wings folded tightly against its body.
2. After a long day of fishing, the gannet returned to its nest with a beak full of fish.
3. The striking white feathers of the gannet made it easy to spot against the blue sky.
4. Watching a gannet plunge into the water from great heights was a breathtaking spectacle.
5. Gannets are known for their impressive diving skills, which they use to catch their prey.
