

GASTROVASCULAR

Meaning: GASTROVASCULAR: relating to a cavity in certain invertebrates that functions in both digestion and the distribution of nutrients throughout the body.

1. The gastrovascular cavity of the jellyfish serves both digestive and circulatory functions.
2. In some aquatic organisms, the gastrovascular system allows for the distribution of nutrients throughout the body.
3. The efficiency of the gastrovascular cavity is crucial for the survival of simple marine animals like hydras.
4. Unlike more complex animals, those with a gastrovascular system rely on diffusion for gas exchange.
5. Researchers are studying how the gastrovascular structures in certain species can inspire bioengineering solutions.
