

GEODETICALLY

Meaning: Geodetically refers to measurements or data that are derived from or related to geodesy, the science of measuring and understanding the Earth's geometric shape, orientation in space, and gravitational field.

1. Geodetically accurate measurements are crucial for modern surveying techniques.
2. The team used geodetically derived data to create a highly detailed map of the region.
3. Understanding the Earth's shape requires knowledge of geodetically defined parameters.
4. Geodetically, the location of the monument was precisely determined using satellite technology.
5. The research focused on geodetically monitoring land subsidence in urban areas.
