

GERMANDER

Meaning: Germander is a flowering plant of the genus Teucrium, often characterized by its aromatic leaves and small, tubular flowers, commonly found in gardens.

1. The garden was filled with vibrant flowers, including a stunning patch of germander that attracted numerous bees.
2. As we strolled through the botanical garden, the fragrant germander caught our attention with its delicate purple blooms.
3. The herbalist recommended germander for its traditional use in promoting digestive health and soothing ailments.
4. In medieval times, germander was often used in herbal remedies, celebrated for its healing properties.
5. While the landscape was dominated by towering trees, the low-growing germander added a touch of color to the forest floor.
