

GEYSER

Meaning: A geyser is a natural hot spring that intermittently ejects a column of hot water and steam into the air.

1. The Old Faithful geyser in Yellowstone National Park erupts predictably every 90 minutes.
2. Visitors gathered around the geyser, eager to witness its impressive eruption.
3. Geothermal activity beneath the Earth's surface causes the geyser to shoot hot water into the air.
4. Photographers lined the boardwalk, hoping to capture the perfect shot of the geyser in action.
5. Scientists study geysers to better understand the geology and heat distribution of volcanic areas.
