

# GLASS-SNAKE

*Meaning: A glass-snake is a legless lizard that resembles a snake and is known for its ability to shed its tail as a defense mechanism.*

1. The glass-snake, often mistaken for a snake, is actually a legless lizard.
2. Many people are surprised to learn that the glass-snake can shed its tail as a defense mechanism.
3. In the sun, the glass-snake's smooth scales can appear almost iridescent, making it a beautiful sight.
4. While glass-snakes are harmless to humans, they rely on camouflage to escape predators in their natural habitat.
5. Researchers study the glass-snake's behavior to better understand the adaptations of legless reptiles.
