

GLAUCOMA

Meaning: Glaucoma is a group of eye conditions that damage the optic nerve, often due to increased intraocular pressure, and can lead to vision loss without noticeable symptoms.

1. Glaucoma is often referred to as the silent thief of sight because it can progress without noticeable symptoms.
2. Regular eye exams are crucial for early detection of glaucoma, especially for those at higher risk.
3. The eye doctor prescribed medication to help manage her glaucoma and prevent further vision loss.
4. Advancements in technology have led to new treatments for glaucoma that can significantly improve patient outcomes.
5. Many people with glaucoma can maintain their vision with proper treatment and lifestyle adjustments.
