

GLAUCOSIS

Meaning: Glaucoma is a condition characterized by the gradual deterioration of vision, often associated with aging and potentially misdiagnosed due to its subtle symptoms.

1. Glaucoma can often be misdiagnosed due to its subtle symptoms.
2. The study revealed a significant correlation between aging and the onset of glaucoma.
3. Patients with glaucoma may experience gradual vision loss if not treated promptly.
4. Research into glaucoma is crucial for developing effective therapeutic interventions.
5. Understanding glaucoma could lead to better preventative measures for at-risk populations.
