

GOATSUCKER

Meaning: A goat-sucker is a type of nocturnal bird belonging to the family Nyctibiidae, known for its distinctive calls and habits, often resembling swallows in flight.

1. The goat-sucker is known for its unique nocturnal habits, often mistaken for a swallow.
2. During the summer months, goat-suckers can be heard calling from dusk until dawn.
3. Many birdwatchers seek out the elusive goat-sucker for its striking plumage and fascinating behaviors.
4. The common goat-sucker, with its camouflaged feathers, blends seamlessly into the landscape.
5. Despite its name, the goat-sucker primarily feeds on insects rather than goats.
