

GROUTING

Meaning: GROUTING is the process of filling the spaces between tiles with a cement-based mixture to improve durability and aesthetics in tile installations.

1. GROUTING is an essential step in the tile installation process to ensure durability and aesthetics.
2. After mixing the grout, careful GROUTING between the tiles can enhance the overall appearance of the floor.
3. The contractor recommended using a polymer-modified grout for better adhesion during the GROUTING phase.
4. GROUTING not only fills the gaps but also helps prevent moisture from seeping behind the tiles.
5. Once the GROUTING was completed, we waited 24 hours before sealing the surface to protect it.
