

GROYNE

Meaning: A groyne is a structure built out from a shoreline to prevent erosion and control sediment deposition.

1. The engineering team proposed the installation of a groyne to protect the shoreline from erosion.
2. After a storm, the groyne was covered in sand, demonstrating its effectiveness in trapping sediment.
3. Fishermen often find good spots near the groyne, as it attracts various fish species.
4. Local authorities conducted a survey to assess the structural integrity of the existing groyne.
5. Despite initial resistance, the community eventually recognized the benefits of the new groyne for preventing flooding.
