

# GUESSWORK

*Meaning: Guesswork is the process of making decisions or forming conclusions based on conjecture or estimation rather than reliable evidence or data.*

1. The scientist admitted that much of his research was based on guesswork rather than solid evidence.
2. In the absence of clear data, the team's decision was largely a product of guesswork.
3. Her ability to navigate through the project's uncertainties was a testament to her experience with guesswork.
4. Guesswork played a significant role in their strategy, leading to both successes and failures.
5. Even with careful planning, some elements of the project were left to guesswork due to unforeseen challenges.
