GUNLOCK

Meaning: Gunlock: a mechanism in a firearm that secures the weapon and initiates the firing process by igniting the gunpowder.

1. The gunlock mechanism ensures that the firearm remains secure until it's ready to be fired.
2. In historical firearms, the gunlock was a crucial component for igniting the gunpowder.
3. Modern replicas of ancient weapons often feature intricate designs on their gunlocks.
4. The craftsman spent hours meticulously repairing the delicate gunlock of the vintage musket.
5. Safety features have evolved, but the basic principles of a gunlock remain largely unchanged.
