

HACKER

Meaning: A hacker is a person who uses technical skills to gain unauthorized access to computer systems, often for malicious purposes or to enhance security.

1. The hacker managed to breach the company's security system without detection.
2. Despite the negative connotations, some hackers use their skills to improve cybersecurity.
3. Law enforcement agencies are constantly working to track down notorious hackers.
4. The hacker's motives were unclear, leaving authorities puzzled about his intentions.
5. Many ethical hackers are hired by organizations to identify vulnerabilities in their software.
