

HARVESTMAN

Meaning: A harvestman is an arachnid of the order Opiliones, characterized by its long legs and a body that is not distinctly segmented into a separate abdomen.

1. The harvestman scuttled across the forest floor, its long legs moving gracefully.
2. During the summer, we often spotted a harvestman resting on the leaves in our garden.
3. Unlike spiders, harvestmen do not produce silk and are harmless to humans.
4. In many cultures, the harvestman is seen as a symbol of good luck and prosperity.
5. We observed a harvestman feeding on tiny insects in the dim light of the evening.
