

HAWSER-LAID

Meaning: Hawsers-laid refers to a method of securing a ship using thick ropes or cables (hawsers) to ensure stability and prevent drifting.

1. The ship was secured using a hawsers-laid technique to ensure it wouldn't drift during the storm.
2. During the docking process, the crew skillfully employed the hawsers-laid method to maintain stability.
3. The hawsers-laid lines provided a robust anchor for the vessel as it waited for the tide to rise.
4. For the larger ships in the harbor, a hawsers-laid approach was essential for managing their considerable weight.
5. The captain instructed the crew on how to properly execute a hawsers-laid configuration to enhance safety.
