

HEARTWOOD

Meaning: Heartwood is the dense, inner part of a tree trunk that is typically darker and more durable than the outer sapwood, often used in high-quality woodworking and furniture making.

1. Heartwood is often darker and denser than the surrounding sapwood, making it prized for furniture making.
2. The carpenter carefully chose pieces of heartwood to ensure durability and aesthetic appeal in the final product.
3. Over time, heartwood forms as the tree ages, providing strength and resistance to decay.
4. In some species, the heartwood can be rich in natural oils, which help protect the tree from insects and fungi.
5. Many woodworkers appreciate the unique patterns found in heartwood, as each piece tells a different story of its growth.
