

HECATOMPEDON

Meaning: Hecatompedon refers to a large temple, especially in ancient Greece, typically dedicated to the gods and characterized by its hundred-foot length.

1. The ancient Greeks constructed large hecatompedons to honor their gods.
2. In the archaeological dig, they discovered the remnants of a hecatompedon that had once been a grand temple.
3. The hecatompedon was designed to accommodate numerous worshippers during religious ceremonies.
4. Historians often debate the architectural significance of the hecatompedon in classical temple design.
5. Visitors to the site marveled at the sheer scale of the hecatompedon, which was a feat of engineering for its time.
