

HELIOTROPER

Meaning: Heliotroper refers to a plant, particularly the sunflower, that orients its flowers toward the sun.

1. The heliotroper thrives in sunny gardens, always turning its blooms toward the sun.
2. In ancient cultures, the heliotroper was often associated with the worship of solar deities.
3. She admired the heliotroper for its ability to follow the sun throughout the day.
4. The artist painted a vibrant landscape featuring a field of heliotropers in full bloom.
5. As the sun set, the heliotroper slowly closed its petals, signaling the end of the day.
