

HIBERNACULUM

Meaning: Hibernaculum refers to a shelter or refuge where certain animals, such as bats, reptiles, and amphibians, retreat to hibernate during the winter months.

1. The hibernaculum of the brown bat provides a safe haven during the cold winter months.
2. In the biology class, we learned about the hibernaculum where various reptiles and amphibians retreat for the winter.
3. Each autumn, the researchers monitored the hibernaculum to ensure the local species were sufficiently prepared for hibernation.
4. The small cave served as a perfect hibernaculum for the turtles as they awaited the warmth of spring.
5. Understanding the characteristics of a hibernaculum is essential for conserving species that rely on seasonal dormancy.
