

HIPPOCAMP

Meaning: Hippocamp refers to either a part of the brain important for memory formation or a mythical creature with the front half of a horse and the back half of a fish in ancient Greek mythology.

1. The hippocamp is a crucial part of the brain involved in memory formation.
2. In ancient Greek mythology, the hippocamp is often depicted as a creature with the front half of a horse and the back half of a fish.
3. Researchers have found that the hippocamp can regenerate neurons throughout life, which is important for learning.
4. The term hippocamp originates from the Greek words for horse and sea monster, reflecting its mythical roots.
5. Studies show that stress can negatively affect the hippocamp, leading to memory impairments.
