

HISTRIONICISM

Meaning: Histrionicism refers to excessive emotionality and attention-seeking behavior, often characterized by dramatic displays that can obscure authentic feelings.

1. Her histrionicism often overshadowed her genuine emotions, making it hard for others to see the real her.
2. In discussions about mental health, histrionicism is sometimes mistakenly equated with mere flamboyance.
3. The actor's histrionicism was both a strength and a weakness, captivating audiences while alienating some critics.
4. In therapy, she learned to recognize her histrionicism and worked on expressing her feelings more authentically.
5. Critics of the performance noted that the histrionicism was excessive, detracting from the overall impact of the play.
