

HOMOLOGATION

Meaning: Homologation is the process of officially approving a product, such as a vehicle, to ensure it meets specific safety, environmental, and regulatory standards.

1. The process of homologation is crucial for ensuring that new vehicles meet safety and environmental standards.
2. Before the product could be marketed, it underwent strict homologation to comply with regulatory requirements.
3. Manufacturers often face lengthy homologation procedures that can delay the launch of their innovations.
4. Homologation not only applies to automobiles but also to various consumer electronics to guarantee quality and safety.
5. The homologation of the new drug was completed after extensive clinical trials demonstrated its efficacy.
