

HYALOTYPE

Meaning: Hyalotype refers to the type specimen of a species that serves as the definitive example for its identification and classification in scientific research.

1. The hyalotype of the species was meticulously cataloged to ensure accurate identification in future studies.
2. Researchers often refer to the hyalotype when discussing the evolutionary relationships among closely related organisms.
3. In botanical taxonomy, a hyalotype can serve as an essential reference point for describing the morphology of a plant.
4. The discovery of a new hyalotype prompted a reevaluation of existing classifications within the genus.
5. Scientists highlighted the importance of preserving the hyalotype in order to maintain genetic diversity in conservation efforts.
